First published online – 7 February 2018, DOI: https://doi.org/10.1017/S13689800180004128

Original text (page 1, Abstract):
NZ had the highest percentage of beverages with sugar added to them (52 %), while the UK had the lowest (9 %, P<0·001).

Correction:
NZ had the highest percentage of beverages with sugar added to them (39 %, P<0·001).

Original text (page 4, Results):
Volumetric nutritional content
Overall, NZ had the largest proportion of supermarket beverages that contained added sugar (52·3 %). This was significantly higher than Australia (42·2 %), Canada (42·8 %) and the UK (9·0 %; P≤0·001).

Correction:
Volumetric nutritional content
Overall, NZ had the largest proportion of supermarket beverages that contained added sugar (52·3 %). This was significantly higher than Australia (42·2 %), Canada (42·8 %) and the UK (38·8 %; P≤0·001).

Original text (page 2):
For each product, the following data were recorded from the product nutrition labels: brand name, product name, energy (kJ), protein, fat, carbohydrate and sugar content (g/100 ml), ingredients list, manufacturer-declared serving size and number of servings per pack.

Correction:
For each product, the following data were recorded from the product labels: brand name, product name, energy (kJ), protein, fat, carbohydrate and sugar content (g/100 ml), ingredients list, manufacturer-declared serving size and number of servings per pack.

Original text (page 3):
Taxation categories were <5 g/sugar/100 ml (no tax), 5–8 g sugar/100 ml (18 % tax per litre) and >8 g sugar/100 ml (24 % tax per litre).

Correction:
Taxation categories were <5 g/sugar/100 ml (no tax), 5–8 g sugar/100 ml (18 pence (p) per litre) and >8 g sugar/100 ml (24 p per litre).

Original text (page 6, Figure 1 caption):
The UK sugar-tax levy proposes three categories: □, <5 g sugar/100 ml (no tax); ■, 5–8 g sugar/100 ml (18 % tax per litre); ▲, >8 g sugar/100 ml (24 % tax per litre).

Correction:
The UK sugar-tax levy proposes three categories: □, <5 g sugar/100 ml (no tax); ■, 5–8 g sugar/100 ml (18 p per litre); ▲, >8 g sugar/100 ml (24 p per litre).
