“I see the world from a ‘horizon’: the world gives itself as immediately around me, as circumscribed by the unique angle of my vision, as a surrounding full of specific meanings determined by my own ends. The other, however, I see as existing in an “environment”: the world is the same for him as it is for others, for it is not conditioned by the uniqueness of his intentionality (as is my horizon)”
(Bakhtin, 1990, *Art and Answerability* xxix)
To act ethically towards the other does not mean that the “I” must fully and unconditionally empathise with the other. Rather the “I” projects him – or herself on to the other and empathises actively, but then withdraws to the original position outside to the other and brings the experience to consciousness. This return to one’s own unique position in being, from which the other can be objectified, constitutes ‘aesthetic activity’…” (Brandist, 2002, p. 39).

Excess of seeing

...that author knows and sees more not only in the direction in which the hero is looking and seeing, but also in the different direction, in a direction which is in principle inaccessible to the hero himself; it is precisely this position that an author must assume in relation to the hero

(Bakhtin, 1990, Art and Answerability, p. 13).
• I owe my freedom from the solipsism of an ‘absolute consciousness’ (AH p. 22) to my bringing-to-birth in the horizon of the other...his aesthetics is a means of escape from the hegemony of epistemology in so far as it begins from that absolute incommensurability of the I and the other that it shares with Christian ethics, and that cognition programmatically denies.

Pechey, 1998, P. 63
In essence all of Dostoevsky’s heroes come together outside of time and space, as two beings in infinity. Their consciousnesses, each with its own world, intersect; their integral fields of vision intersect. At the point where their fields of vision intersect lie the culminating points of the novel. At these points also lie the clamps holding together the novelistic whole (Bakhtin, 1984, Rabelais and his world, p. 277).
• The ‘truth’ at which the hero must and indeed ultimately does arrive through clarifying the events to himself, can essentially be for Dostoevsky only the truth of the hero’s own consciousness. It cannot be neutral towards his self-consciousness. In the mouth of another person, a word, or a definition identical in content would take on another meaning and tone, and would no longer be the truth (Bakhtin, 1984, Problems of Dostoevsky’s Poetics, p. 55).
• Men do not understand one another by relying on the signs for things nor by causing one another to produce exactly the same concept, but by touching the same link in each other’s sense perceptions and concepts, by striking the same key in each other’s spiritual instrument, whereupon corresponding, but not identical concepts arise in each of them. (Cassirer, 1953, p. 160, emphasis added)
Dostoevsky’s polyphonic principle (according to Bakhtin)

“never use for objectifying or finalizing another’s consciousness anything that might be inaccessible to that consciousness, that might lie outside its field of vision”

(Bakhtin, 1984, p. 278)
Dostoevsky’s principal achievement as an artist lies in the creation of a new type of novel called *polyphonic* in contradiction to *homophonic* novels of writers such as Lev Tolstoy, Turgenev, and Goncharov...Characters in such a novel are no longer objects manipulated by the author, as Bakhtin claims they are in a homophonic novel, but subjects coexisting as autonomous worlds with the world of the author and contending with him for the reader’s attention. The author expresses himself, then, not so much through one character or another, but chiefly through the structure of the novel...

(Krasnov, 1980, p. 5).
“point of view is always situated. It must first of all be situated in a physical body that occupies time and space, but time and space as embodied in a particular human at a particular time and in a particular place”.

Holquist (in Bakhtin, 1981, Dialogic Imagination, xxviii)
Dialogism and polyphonism are passwords to a new cultural paradigm – which, with difficulty and through all the sluggishness, monologism and torments of communication, is cutting itself a path.

(Gurevich, in Emerson, 1997, p. 149)
Dialogism is ....a method for interrogating and understanding humans in an ever-changing world. The dialogic method operates at every level of the research activity, from the way we frame a question to methods we deploy and the style in which we communicate our observations.

(Bandlamudi, 1999, p. 61)
Dialogism:

• Beyond words (utterance)
• Beyond intersubjectivity (heros and authors)
• Beyond learning (aesthetic acts)
• Beyond finalisation (consummation)

Beyond the exclusive gaze of the teacher
“all practices, discourses, and relations are inherently dialogic because the meaning making process is dialogic. Life is ontologically dialogic...The ontologic approach to dialogue calls for practices, and especially education, to make dialogicity its guiding principle”

(Matusov, 2009, p. 5)
Heteroglossia

“Bakhtin’s way of referring, in any utterance of any kind, to the peculiar interaction between the two fundamentals of all communication”

(Holquist, 1981, xix-xxx)
Influences on Bakhtin’s view of language

• Semiotics
  - de Sausurre’s study of signs
  - Buhler’s organon model and sematology
  - Cassirer’s emphasis on symbol
  - Voloshinov’s merging of langue and parole

“Detached from the feeling of the author’s connecting and form-giving activity, metaphor dies, that is, ceases to be poetic metaphor or becomes a myth” (AA, p. 313)
What can be seen and how it is interpreted by participants (answerability) = Utterance

“....these notions could be studied from birth onwards, starting with the babies cries, vegetative sounds, and gestures, most often regarded by the caregiver as a contribution to the dialogical exchange” (Junefelt, 2007, p. 11)
Genre

- A speech plan or speech will which determines the entire utterance, its length and boundaries

(Bakhtin, 1986, p.77)
• The notion of a genre emerging from social activity switches the focus from a more static tableau-like notion of setting (for example a classroom) to the various different social activities, involving different kinds of speech genres, which may be going on within it

(Mabin, 2006, pp. 18–19)
Form: A bridge to the unknown. “A transitory gift”
(Renfrew, 2006, p. 261)

Content: Function of the act. Perceived purpose.

Genre: A language plan or will (selected from the repertoire the individual has available to them, in order to convey meaning)

Seen only through interpretive eyes (visual surplus)

Bakhtin’s philosophy of laughter

- Rebalais – Bakhtin’s 1946 thesis: François Rabelais in the history of realism
- Medieval laughter as “an almost elemental condition” of freedom against renaissance “artistic awareness and purposefulness” (Bakhtin, 1984, p. 73)
- Employs the novel in 1930’s to celebrate “linguistic and stylistic variety as a counter to tight canonical formulas” (Holquist, in Bakhtin, 1984, p. xvii)
- Influenced by Lunacharsky’s “The social role of laughter”
It was here that “laugher made its unofficial but almost legal nest under the shelter of almost every feast” (p. 82)

(Bakhtin, 1968, p. 77)
Features of carnivalesque

Ridicule; Suspension of hierarchy; Ambiguity; Ambivalence; Contradiction; Extremes of abuse, grotesque and laughter; Emphasis on the body; Decrowning of authority
To allow for regeneration and growth that exemplifies the “awakened man”

Elements of the earth that “swallow up (the grave, the womb) and at the same time an element of birth a renascence (the maternal breasts)…” (Bakhtin, 1968, p. 21)
“Can Bakhtin’s scholarship, in itself, offer something distinctive and valuable to education, or is it merely useful in supporting already established positions?”

(Matusov, 2007, p. 232)
[Bakhtin] reminded us that besides object of analysis, there is subject of analysis that the researcher directly or indirectly addresses in his/her research (Bakhtin, 1986). The unit of analysis has to reflect not only the objectivity of the analysis but also its dialogic subjectivity. The defined unity – the Absolute Spirit in Hegel (1967) or the holistic unit of analysis in sociocultural research – does not exist, and arguably, it is not needed....What does methodology without reductionism and holism look like?

(Matusov, 2007b, p. 326)
A dialogic approach to investigation

- Looks for interpretive point-of-view – especially areas where an electric current ignites meaning
- Looks for form and content = genre
- Looks beyond the verbal in isolation
- Looks for personality, not outcome
- Recognises the hero and the author (i.e. subject-subject versus subject-object)
- Does not aim for synthesis
- Looks aesthetically, artistically at the social act

"we climb from the headier reaches of conceptuality up into the boldest metaphoricity, then up again into a space where even these distinctions cease to hold and allegory gives way to…anagogy" (Pechey, 1998, p. 67)
What is going on today parallels the radical change of the very sense of education when the Middle Ages gave way to the New Time from the trivium and quadrivium of the Classical Middle Ages to the ideal of the “educated person” having acquired “the last word” in “science and technology”... Now, as well, formation of reasoning and comprehension is changing (terribly slowly for now, but out of necessity) from the “educated person” to the “person of culture”, who conjugates in his or her thinking and activity different cultures, forms of activity, values, semantic spectra that are not reducible to one another. The very content of education must be transformed

White, E J. Dialogic-dialect: Epistemological alignment or ontologic provocation in education?. Education Philosophy & Theory (in press)
1. Teacher learns with students
2. Teacher suspends certainty
3. Student agency underpins all classroom activity
4. Content is always problematic, it is ideologically situated
5. To know means to address and reply
6. Student and teacher consciousnesses are of equal importance
7. Curriculum is defined by the kinds of questions that are asked by student and teacher of each other
8. Culture is reconceptualised and thus viewed as transformative
- Over-reaching hegemonic intent through language
- The teacher as Dostoevskian novelist
- Maintaining fluid identities – othering otherness
- Opportunity spaces
- Aesthetic appreciation
- Co-narrative meaning making
- Authorial teaching vs Internally persuasive discourse
- Student-teacher/student-student genres
- Carnivalesque in the classroom
- Chronotope
- Use of metaphor
- Play
- Third-ness

- Inquire

“Our real practice is like dust under the carpet – every now and then it escapes but quickly gets swept away if it doesn’t make us look good”.

Perhaps it requires watching, living with, and reflecting over time. Teachers need support for this kind of work, but rarely do they find it....What has to occur for things to change is not simply an intellectual shift, so that teachers have more information. This is not just the learning of new pedagogies....Rather, change also has to entail a moral shift, a willingness to open oneself up to the possibility of seeing those who differ from us. This is very hard work, but work that lies at the heart of teaching.”

(Hicks, 2002, p. 152)
“Bakhtin’s writing on carnival is productive not only for reimagining learning but also for helping us to understand the demands and dangers of democracy”

How can the teacher ontologically engage the student in this learning when the student is already engaged in a zillion other, competing activities?  AND

How can the teacher engage the student in important learning experiences (responsive authorship) while preserving their freedom to opt out of these experiences and design, initiate, and choose different ones (self-generated authorship)?
