/** SCRIPT USED BY:          04_Inventory.txt
/**
/** COVERAGES USED:          W_GeoNet_LSI
/**
/** FUNCTIONS USED:          &TYPE          DROPITEM          &RETURN
/**
/** PURPOSE:                To delete temporary columns added in 04_Inventory.txt after they have
/**                          served their purpose. Save space and tidy up the attribute table.
/**
/** ..... HISTORY.....
/**
/** 19 MARCH 2009          Created DROPITEM.txt containing two routines on to drop
/**                          AUTOID%.AUTO_ID%, YEAR%.AUTO_ID%,
/**                          LOC_CLASS%.AUTO_ID%,LSIW_BUFF_%.AUTO_ID%#, and
/**                          LSIW_BUFF_%.AUTO_ID%-ID; the other to drop all those and
/**                          WLSI_1_TO_%.AUTO_ID%#, WLSI_1_TO_%.AUTO_ID%-ID.
/** 23 MARCH 2009          DROPITEM2.txt version created using GEONETLSIW4 coverage, and
/**                          got rid of routines as I ran out of hard drive space in my workspace.
/**                          Have added DROPITEM processes throughout the 03_Inventory.txt
/**                          script when the attribute column in quetion will no longer be
/**                          needed. This script only drops AUTOID%.AUTO_ID%,
/**                          YEAR%.AUTO_ID%, LOC_CLASS%.AUTO_ID%,
/**                          LSIW_BUFF_%.AUTO_ID%#, and LSIW_BUFF_%.AUTO_ID%-ID.
/** 27 APRIL 2009          The coverage used has had its name changed to W_GeoNet_LSI (in
/**                          03_Inventory.txt).
/** 10 JUNE 2009           Renamed Loop_Dropltem.txt as 04d_Dropltem.txt. 03_Inventory is
/**                          now 04_Inventory.txt.
