

```

/** ----- CHECK PROGRAM AND SET TO ARCEDIT -----
/** FILE NAME: CheckProgEdit.txt
/** AUTHOR OF THIS SCRIPT: RENEE SCHICKER
/** SCRIPT CREATED: 02 MARCH 2009
/** LAST UPDATED/MODIFIED: 27 APRIL 2009
/**
/** PURPOSE: Save writing out this commonly used process over and over again in various
/** other scripts. It checks what program is currently in use in ARC workstation
/** (black box window) and sets it to ArcEdit
/**
/** SCRIPT USED BY: 04_Inventory.txt Loop_create.txt
/** Long_compile.txt 05_Geology.txt
/** Join_QMAPs.txt 06_Soil.txt
/** 07_LandCover.txt 08_Roads.txt
/** 09_Faults.txt 10_Rivers.txt
/** Selected_LIs
/**
/**
/** ..... HISTORY .....
/** 02 MARCH 2009 Decided to create a small individual script for this process rather
/** than write it out in its entirety each time, which saves a bit of time in
/** writing code.
/** 9-10 MARCH 2009 Formatted listed everything and added descriptions and history.
/** 25 MARCH 2009 Updated list of scripts that use this script and added the scripts in
/** development: LSI_Inventory.txt, Join_QMAPS.txt, Loop_Create.txt,
/** Loop_compile.txt (might scrap), Long_compile.txt (might scrap),
/** Long_compile2.txt (Looks good – keep).
/** 27 APRIL 2009 Check script is consistent with others, update script information.
/** 03_Inventory.txt, Long_Compile.txt, 05_Geology.txt,
/** Join_QMAPs.txt, and 14_LRIErosion.txt are all new script names
/** (see those scripts' HISTORY section for details on modifications)
/**
