

Coastal Storm Database - Event Summary

Date: 8-10 Aug 1966	Wind Direction: S
Event Type: Wind	Gisborne Duration (Hours): -
Location: Wellington	Wellington Duration (Hours): 37
Origin: Southern Ocean	Pressure Gradient: SSE
Type: East Coast Secondary Low	

Synoptic Conditions

A cyclone developed over the Chatham Islands from a southern ocean trough and was being followed by a large anticyclone in the western Tasman sea. On the 8th this cyclone had moved east of the Chatham Islands and extended a trough to the west over the North Island. A strong SSE airstream developed on the western side of the trough over the eastern North Island on the 19th and during which ridging covered the South Island.
