Outline: We are living in an ever-changing world, where new methods are being introduced to carry out the most straightforward task, where new inventions are being proposed to ease our daily operations, where new ideas are popping out at every corner. Since the dawn of time, mankind has been using innovation and creativity to survive and enhance life. With the use of technology, it has enabled more possibility and more significant endeavour. Now and forever, we are dependent on technology, that has played a substantial role in our design solutions, which inescapably affect everyone of us.
