

# Map 4.1 Landslide Susceptibility for the Waikato Region Determined by Weights of Evidence

## Landslide Susceptibility

- Very Low
- Low
- Moderate
- High
- Very High

Projection:  
New Zealand Map Grid (NZMG)

Datum:  
Geodetic Datum 1949

Model Used:  
Weights of Evidence  
Model B Data

Predictor Parameters:  
Slope;  
Maximum Monthly Rainfall;  
Land Cover (Land Use);  
Geology;  
Distance from Fault Lines.

Classification:  
Natural Breaks
